

Pharmacy Cost Containment

We have depth of expertise.

Our demonstrated strengths in pharmacy purchasing and inventory management enable our clients to reduce pharmacy costs to the lowest levels possible.

- Inventory reports
- Review drug wholesaler accounts
- Inventory management processes
- Purchase quantities
- Storage or distribution procedures
- Brand vs. generic
- Vendor invoice contract compliance
- 340b utilization
- Evaluation of split billing mapping
- Bundled charge carve-outs
- Metrics to measure effectiveness

Pharmacy is consistently the budget line item with the highest year over year percent cost increase for our clients nationwide. TMG's Pharmacy Cost Containment service has a proven track record of mitigating or reversing these explosive cost increases.

A Plan. A Process. A Solution.

We find that many of our clients struggle with the review and analysis necessary to effectively manage pharmacy wholesaler account utilization, vendor invoices and inventory optimization. Our process allows for a second set of eyes to identify overcharges, optimization opportunities and results in significant overall drug cost savings.

TMG Pharmacy Cost Containment Subscription Clients Receive:

- Monthly review of pharmacy vendor invoices to ensure accordance with contract terms
- Assistance in collections of identified overcharges
- Review of drug purchases
- Wholesaler optimization recommendations
- Cost savings implementation support
- Customized quarterly and annual reports detailing findings, recommendations and documented savings
- Our services are billed at a small flat rate quarterly and can be canceled at any time
- If savings does not exceed 200% of our fees, we will not bill.
